## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 34 and 36 are rejected under 35 U.S.C. 102(b) as being anticipated by Sharples (D343,698). Sharples shows a blow dryer capable of being used on livestock comprising a substantially cylindrically shaped blower housing (fig. 1) with an air inlet opening (fig. 4) and an air outlet opening (fig. 3), at least one motor within the blower housing and a nozzle shaped to gradually contract from a wide end attached <sup>to the</sup> ~~to the~~ blower housing and having a diameter approximately the same as the blower housing to a narrow end pointing away from the blower housing (figs. 5, 6).

### ***Allowable Subject Matter***

Claim 35 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Included for further reference are: Deguines (D428,528), Watanabe et al (D462,140) and Barski (D468,862).
